

SIRTAN & SIRPRESS - Copolimeri a base di stirene/maleico in dispersione acquosa

(Waterborne styrene/maleic copolymers)

We offer waterborne copolymers (styrene-maleic anhydride), under the brand name of SIRTAN® and SIRPRESS® mainly used for leather industry and paper sizing

SIRTAN®

| PRODUCT | PH | SOLID CONTENT (%) | VISCOSITY AT 25° C (mPa.s) | DESCRIPTION |
|----------------|-----------|--------------------------|-----------------------------------|---|
| 4240 | 7-8,5 | 34-46 | 1900 | Styrene-maleic anhydride based copolymer salified with sodium hydroxide in opalescent water solution. |

SIRPRESS®

| PRODUCT | PH | SOLID CONTENT (%) | ASPECT | DESCRIPTION |
|----------------|-----------|--------------------------|----------------------------|---|
| 2124 | 7-8,5 | 24-26 | Lightly opalescence liquid | Styrene-maleic anhydride based copolymer salified with sodium hydroxide in opalescent water solution. |
